In speaking of the parties who present themselves, while the great Santa Fe passes, Mr. Frey stated that he never saw the country look so prosperous and especially bright, while the farmers have part of their oil fields and now have back accounts.

It such good times keep up for an other year, at the same rate as the past six months, continued Mr. Frey, "the men of a score of mines and hard times will be entirely induced by the Santa Fe railway to do the biggest business in its existence both in passenger and freight traffic, and, of course, accordingly connected with the system is hope."

There are several parties in our vicinity, out prospecting and we might at any time expect the long delayed boom for our much neglected and yet scrubbed and beautiful valley of the Colorado.

Our modest and excellent school teacher, Mrs. Gilbert Larue, a genuine drawing card for our public school, so busily surrounded by three scholars and expects to get several more in the next few days. This is the largest number of pupils in school ever had, our scholars to be congratulated on having acquired such an accomplished and thoroughly educated principal.

George Trimble, of Fort Collins, made an extensive sheep run again in the city, and was arranging to visit the adjacent sheep ranges.

Mrs. Joseph de Marz, who was at these meetings a guest to her daughter returned home on the beloved passenger train early yesterday morning.

He was 30 years of age, but at the time he came here he was in vigorous health and entered upon his work with enthusiasm. He presided over the Itinerant club and participated in the conference exercises, after which he attended the Spanish mission conference. Later he started on his work, beginning at Santa Fe and going to Chama and Batopilas, where he was taken sick. His son, who also a minister in Indiana, came to his bedside and was with him when he died. In the short time he was here he made a deep impression for good by his earnest spirit and evangelical fervor.

Moses Kettler, who has also been here through the morning and questioned as to what they knew, but to no purpose. Like all successful detectives they have the faculty of maintaining profound silence, which is the despair of the reporter.

Mr. Kettler looks considerably the worse for the trip, and is suffering from a very bad cold, which was contracted from exposure.

The party covered a large tract of territory in western New Mexico and northern Arizona. The party went as far as St. John's, Arizona, and then returned to Holbrook. It is reported that the officers are confident that they know who held up the train and very near where they are holding out. More definite information, however, is withheld, as it might interfere with the capture of the criminals.
